Summary

As a soon-to-be graduate specializing in software engineering, cloud computing, and networking, I bring a strong IT foundation and a proactive approach to problem-solving. I've developed websites using the MERN stack, PHP, and MySQL, with some hosted projects showcasing my skills. Proficient in Android Studio for application development, I'm also actively learning new languages and frameworks. My focus is on robust software solutions, efficient infrastructure optimization, and staying updated with industry trends. With a commitment to growth and innovation, I'm ready to contribute to dynamic IT projects and excel in the field.

Skill Highlights

- Frontend and backend proficiency: HTML, CSS, React, PHP, Node.js, MERN stack.
- UI/UX expertise: React, Tailwind CSS, responsive design.
- Database management: MySQL, MongoDB.
- Cloud computing: AWS services.
- Networking skills, HCIA Datacom course graduate.
- Collaborative Agility

Experience

Fastech Solutions, May-2023 To Date
Web Development Specialist

Developed websites for clients, ensuring functionality, user experience, and security. Collaborated with teams to meet project requirements and deadlines. Utilized frontend and backend technologies to create responsive and dynamic web applications.

Junior Network Engineer

Designed and implemented efficient network architecture to meet performance needs and deployed security measures to prevent cyber threats. Enforced strict security protocols, monitored network performance, and resolved issues promptly. Conducted capacity planning, contributed to ongoing projects, and enhanced service delivery efficiency. Also, performed hardware/software tasks and documented department activities.

Kenya Commercial Bank, Feb-April 2023
Internship

Handled data remediation, accounts archival and opening, alongside addressing complaints and processing card applications in customer service, refining communication skills. Conducted data entry, reconciliations, and credit analysis for loan proposals, collaborating with Sales and Channels teams to gain exposure to sales and marketing. Enriched IT skills, including internet banking management and data-related tasks like analysis and database management, ensuring data accuracy and integrity, and implementing security measures.

One Acre Fund, Oct 2020-Feb 2022
Supervisor at the PAYG Project.

At One Acre Fund, improved customer engagement via the PAYG Project. Excelled in spreadsheet skills and analytics, utilizing Angaza platform and G Suite.

Education

Jomo Kenyatta University of Agriculture and Technology
Bachelor of Science in Information Technology.
2019-2024

Certificates

Huawei HCIA DATACOM certification.
